Attention:

Grounds Maintenance Proposal

I have pleasure in providing a proposal for the grounds maintenance at Waikaraka Park Family Speedway.

My proposal has been costed on the basis of using the machinery and equipment owned by Auckland Stock and Saloon Car Club Inc (ASSCC). The fuel costs are included in my price. It would be the responsibility of ASSCC to provide and maintain the machinery and equipment in good working order. I would be responsible for operating the machinery and equipment in a safe and professional manner at all times.

Should you require the grass to be collected using a catcher, the disposal costs would be additional to my quoted prices.

Lawn Mowing (excludes infield area)

I propose the lawns to the facility are mowed every three weeks from May through to the end of August and every two weeks from September through to April. On occasion the lawns may require an additional cut during the racing season. This would only be carried out at the direction of the committee.

My price per cut including labour and fuel costs is \$_____

Edge Trimming

I do not anticipate the edge trimming to be required as regularly as the lawn mowing. I propose the edge trimming be performed on a three weekly cycle or as and when the committee feel it is required. The edge trimming would include the edging of all grassed areas but excluding the infield

My price per cut including labour and fuel costs is \$_____

Wet Spraying

The weed spraying should be undertaken once a month in the period from September through to May. This would include the pits and public areas however it excludes the infield area.

My price per spray including labour and chemical costs is \$_____

Infield Area

Given the high level of presentation required of the infield during the racing season I propose the following grounds maintenance plan.

Two weeks from the start of the season the infield grassed areas to be mowed and all edges trimmed. This includes the top of the wall area. This then needs to happen the week leading into each race meeting. By only mowing the lawn prior to a meeting you give the grass area time to recover between meetings. The grass will be mowed on a #5 height setting (long setting) to minimise root burn during summer

My price per cut including labour and fuel costs is \$_____

My proposal is based around the racing season and cost effective maintenance during the off season. Where the facility is likely to be used during the off season and any of the above tasks are required these can be undertaken as required on short notice.

I appreciate you taking the time to consider my proposal and look forward to entering into a long and cordial partnership with ASSCC.

Yours Sincerely
